Research Summary

Md. Humaun Kabir is an Assistant Professor in the Department of Economics at Islamic University, Kushtia, Bangladesh. He is currently pursuing/ongoing his PhD in Economics, with research interests spanning public finance, taxation, economic growth, development economics, poverty alleviation, and applied econometrics. His academic work particularly focuses on tax policy, revenue mobilization, and sustainable economic development in emerging economies, with special emphasis on the context of Bangladesh. Mr. Kabir is actively engaged in research on contemporary economic issues and employs advanced quantitative and econometric techniques to investigate policy-relevant questions. His scholarly interests also include fiscal policy analysis, governance, labor markets, and the socioeconomic implications of technological and institutional transformations.

Alongside his research activities, he is committed to teaching and mentoring undergraduate and postgraduate students, fostering analytical thinking and evidence-based policy research. He has published more than 25 articles in national and international peer-reviewed journals. Through his academic and research endeavors, he aims to contribute to the development of effective economic policies and promote sustainable and inclusive growth in Bangladesh and other developing economies.
